

SEVENTH ANNUAL **BULL SALE** APRIL 1, 2023 / 1:00PM

52 YEARLING BULLS AND 3 TWO YEAR OLDS

HOULD ANGUS

CATTLE WITH **MATERNAL PERFORMANCE.**
GENETICS WITH **MATERNAL INTEGRITY.**

Join us at the ranch for the pre-sale lunch and live auction.

► www.houldangus.com ◀

HELLO TO ALL OF YOU ANGUS ENTHUSIASTS

We would like to welcome you all to our 7th Annual Hould Angus, live auction bull sale on April 1, 2023 at the Hould Angus Ranch South of Havre, MT.

Wow it's been a crazy one since I last did this. From drought, hoppers, late fall full of rain, lots of snow and record breaking temperatures, it was again a year that I'm glad is behind us. Even with all this as a hurdle, I wouldn't trade this lifestyle for anything. It's times like this that truly make me happy with our decision to produce the type of cattle we do. They have been tested far more than I ever wanted them to be tested. When it was time to find the results of the years bred back, I was absolutely astonished how resilient and tuned in these cows are. I'm truly amazed. To make things even better, this crop of calves is the one I have been waiting for. It's solid from top to bottom and filled with sires that I used years ago with great success as well as other sires that I only dreamed about being able to use and offer our customers. It's a culmination of some of what I feel is the who's who of maternal giants. It is with great pleasure that we invite you all to the Ranch and share with you our good fortune of these outstanding genetic treasures. At Hould Angus we believe that the mother cow is first and foremost, and we produce cattle with **Maternal Performance** backed by genetics with **Maternal Integrity**.

I Bob and Ruby Hould Family

OUR CATTLE

For the last 23 years at Hould Angus we have turned against the mainstream hype of great arithmetic behind each cow. Rather, we have developed a herd of cattle that will survive and excel in our environment by using maternal genetics with maternal integrity. **What is Maternal Integrity?** Take a look into Angus Journals and stud books from the last decade and you will see the ridiculous amount of bulls promoted to everyone as the future maternal giant of the breed (because of great arithmetic). Then, look at how many of those greats have completely fallen on their faces, only to leave commercial producers high and dry. We have done our due diligence and driven countless miles to physically evaluate daughters of the sires that we use at Hould Angus. This is one of many things numbers can't evaluate but your eye can. With this philosophy and a lot of patience, we hold out and let the dust settle before we utilize the sires in our program.

We believe that it is time for the maternal Angus cow to make a comeback. With fads and trends of mainstream Angus breeders and AI studs, it has become very evident that the high EPD cattle are not designed for an environment that requires them to be self-sufficient and last well into their teens in production. Is there a place for these cattle? Yes, I definitely believe so. But is it in a ranch scenario that requires cattle to be moderate in size (4.5-5.0 frame), deep bodied, extremely easy keeping and fertile? All of this without a heavy supplement? NO! I don't believe it to be possible to achieve in volume.

We are not anti EPD or DNA but stand on the side of caution with our desire to utilize them as a true breeding tool. With AAA playing with the numbers on a weekly basis, it makes it very hard for us to rely on them as much as many breeders do. To each their own, but we will choose to carry on as we have for now.

BULL OFFERING

Our bull offering this year is again very heavily influenced by OCC and the old N-Bar Emulation bloodlines. Crossing these two lines has produced females that are very functional in their design, with tidy udders and extreme fertility. We consider our cow herd to be moderate in size and very capable of maintaining themselves in great shape even through some very tough conditions. With all that being said, we firmly believe that our bull mates to these cows should offer the same attributes to change your herd towards these functional traits and/or for our long time customers to maintain the type that has brought them back to Hould Angus.

HEIFER AND BRED COW PLACEMENT

Each year we are getting more and more interest in our style and type of cattle. If you have females for sale of any class and they are out of and/or bred to Hould Angus bulls, or suitable like genetics, we would like to know about them. The demand is great and the availability to acquire low input moderate framed females is rather low. Please contact us in the future and we will certainly give you a hand in buying or selling your cattle.

JB and Ruby Hould

TERMS & CONDITIONS

All cattle must be paid for in full on sale day or as otherwise arranged prior to the sale.

LIABILITY DISCLAIMER

All persons that attend the sale do so at their own risk and the owners or anyone associated or connected with this sale assume no liabilities for any accidents that may occur.

BULL DELIVERY

Bulls will be delivered free of charge up to 500 miles to central points. Beyond that will be at cost. Delivery of bulls will begin mid-April.

SEMEN TESTING

All bulls will be semen tested by Chinook Veterinary Clinic before delivery.

HEALTH/VACCINE

7 Way/50M: Twice	Enforce III
Mycoplasma : Twice	Pyramid 5
Fusogard (Footrot): Twice	Ino-pour
Type A Colostridial: Twice	Sabre (Lice)
Safeguard (dewormer) in the ration	Clean-up II (Lice)

RETAINED INTEREST

We retain 1/3 semen interest in all bulls selling unless otherwise stated in catalog or from the block. The 1/3 semen interest is a semen revenue sharing interest only with 100% of the bull's salvage value belonging to the buyer. All collections will be done at the expense of Hould Angus and at the convenience of the buyer. Please contact us if you have questions.

BREEDING GUARANTEE

All bulls are guaranteed breeders and our guarantee is simple, we stand behind the genetics and breeding soundness of our bulls 100% for the first breeding season. If a genetic issue surfaces or if the bull is unable to settle cows, you will get either full credit or a replacement bull if available. If a management issue or act of God occurs, we will stand of the risk. Simply notify us by September 15, 2023 to receive your credit, less any salvage value. Livestock Insurance will be available and is recommended for purchases over \$7,000.

Genetic Rustler is proven himself to be great from calving ease, weaning to yearling. An outstanding representation of his sire and carries with him the same sex drive characteristics of his father as well. He is constantly herding his cows and never letting them out of his site. I have never seen him sitting around the water and waiting for something to do. His calves display a great deal of their sire's family traits phenotypically as well. His mother is a superstar in our herd, and we have used 3 bulls out of her. We are offering several bulls out of her in this year's sale. Rustler has shown that he doesn't take second place to anyone in terms of muscle and growth. Semen available.

It's pretty hard not to really like the type of animal this bull produces. His calves did very well to weaning and took off on feed to yearling. He will produce cattle that are a little bit bigger outlined than some of the OCC blood lines we have used in the past. But they still have that fantastic phenotype we like. Hunter and Legacy have the same mother and may be a large part of the equation as we really like our Legacy cattle as well. It was early 2000's when I first got to see the first Hunter cows and bulls popping up around in my travels. I knew I needed to use him very hard at some point and glad I did. He will be used for several more years to come. An outstanding offering this year.

Jockey is an Anchor son out of Great Plains full sister. Anchor has always done an amazing job here and that was a huge draw for us to Jockey. Jockey sold into Argentina as a yearling and has made a name for himself as a female making extraordinary. His daughters here have done an excellent job and will no doubt be used heavily in our ET program. Jockey progeny have proven themselves to be able to wean heavy and to make big gains in the feedlot. This is a very special offering. I'm not 100% certain but fairly sure that there has never been any Jockey sons available at auction in North America.

We purchased Freightcar to bring in OCC Hunter. He was a very impressive phenotype and as stout as you would ever want. Stacked with a female line that never ends and so we knew he was the one we needed to bring on board. He has not disappointed us at all in his ability to calve easily and produce calves that are extremely easy fleshing and very moderate in size. You can tell by his photo that he is definitely all there.

If you have followed our program you know how much we cherish our N-Bar Emulation 5522 daughters. They are one of the most range adaptable cattle we have ever been around. Once they hit maturity I would say that they flesh as easily as any sire we have used. We decided to use XP in 2015 and very thankful we did. We have 16 daughters of Emulation 5522 XP in production. They have an average ratio of 106 on their calves. Not to mention another 6 to calve this year and 10 to bred this spring. If you have used a lot of our OCC bred genetics and feel it's time to make a genetic shift on a generation. This is a bull that will no doubt work for you.

Fusion has proven to be an excellent addition to our herd bull battery. He is a OCC Tremendous son out of the Miss Wix 2022 cow. Which makes him a half brother to our Cornerstone bull and a full brother to McCumber Tremendous 2008 who resides in the Redland herd. Fusion is very correct with length, style and muscle to spare.

As most of my longtime friends and customers know, I am a huge fan of Emulation 5522 and OCC Anchor. Both have proven themselves to produce daughters that are the most range adaptable females I have ever had around. And to stack those super bulls on top of Juanada gives this bull the credentials to be one of the best cow making bulls to ever be born here. 767 came off his ET recip cow at about average at weaning time and went into the feed yard and took off on the gain and has never looked back. He may not be the thickest bull in the pen, but I will put money down that his daughters will be second to none. Oh, and did I mention his mother is Awesome and is also the mother of Genetic Rustler 440.

Joker has maybe been my pinnacle bull to use from OCC. It never fails, when I see a cow that I like in type, she will no doubt have Joker lined up in her pedigree somewhere. Over the years of talking with people about cows they have seen, it is more times than not that when Joker is brought up, it is with high praise and admiration for his daughters. Joker will without a doubt sire wide bodied cattle with muscle and shape to spare. I'm confident that these bulls offered today as 2 year old bulls will be a sight to behold. The daughters that these bulls produce will make some of the finest replacement females you could ask for. I appreciate the opportunity Tim and Trudy allowed us by selling us the Joker semen. And now it is our pleasure that we offer our customers this very rare and exciting opportunity. We were very fortunate to get a lot of heifers out of these matings and look forward to seeing them grow and prosper in our program.

Legacy is a bull that we were fortunate enough to get semen on. He and OCC Hunter have the same mother and I feel that is what makes me really like what Legacy has done here. Our oldest daughters are 4 now and have done very well. Extremely easy fleshing big middled cows with impeccable udders and teats. Legacy made his mark in Canada and he is well revered there. We have an insert in the catalog about the history of OCC Legacy.

HISTORY OF OCC LEGACY

In December of 2002, Harvey Bowerman & John Setrakov traveled to Ohlde Cattle Co in Palmer, Kansas. OCC Legacy 839L was purchased along with 5 other bulls. At that time, Legacy was a standout amongst many other high caliber bulls of the Ohlde breeding program. Legacy was the greatest son of OCC Echelon, a full brother to OCC Emblazon, although both bulls were very similar, Echelon was regarded for his calving ease. Legacy was a natural calf out of a top OCC Anchor daughter, Dixie Erica 960E. Ohlde Cattle Company retained an American semen interest, while partners Bowerman Bros Angus Ranch, Hillfire Ranching and Crowfoot Cattle Co owned 100% of the Canadian semen rights. Bowerman Bros and Hillfire Ranching had 100% walking rights.

Legacy exhibited intelligence, character and the ability to maintain himself under range conditions. He excelled at all these traits and passed them on to his offspring. Legacy was extremely good-natured and this shows still in many of his daughters. The picture of Legacy is of him as a 5 year old in September 2006, after natural service of 98 females over 2 breeding seasons in Northern Saskatchewan.

Legacy was a "jack-of-all-trades." At first glance, phenotype was an easy observation — but it went deeper than phenotype. He put incredible udders on his daughters, many of those daughters produced well into their mid-teens. The progeny of Legacy had unmatched feet, with superior heel and claw structure. Many of his sons were still covering cows after 7 years of age. If you were looking for a bull who would sire easy-fleshing progeny with great feet and udders, added longevity and fertility, Legacy checked all the boxes.

When Legacy came to Bowerman Bros and Hillfire Ranching, he was crossed on many Johnston Nugget 370E daughters. Nugget 370E was a son of Nugget 801X of JRS out of N Bar Kinochtry Beauty 7393 — Harvey said this cross was magical. Over the years, Legacy was crossed with many Nugget daughters and granddaughters. The Legacy sons topped their annual bull sale for many years and grandsons of Legacy carried on to be highly sought after as well. Legacy had a positive impact on the breed from coast to coast in Canada, as well as North & South America. OCC Legacy 839L passed away of natural causes due to kidney failure on October 2, 2012. Although he has been deceased for over a decade, his lasting impacts have been left in many heirs. His granddaughters and great-granddaughters carry on many of his attributes. Legacy was a true breeding masterpiece who will always be highly regarded and a bull that can always take you back to the basics to correct an ever changing breed.

SEE LOTS 2, 12, 13 & 38

Back in 2002 I was fortunate enough to purchase a cow that would forever in her lifetime be a producer of excellence here. At the early age of 6, I realized this and began flushing her extensively to some truly foundation type bulls. Now, 21 years later, we have numerous daughters in the herd that have done an excellent job for us, many that have the same phenotype but far surpassed their mother in production. Juanada 1650 (12yrs old) and Juanada 9021 (14 yrs old) are a couple of them that epitomize their mother in type and surpassed her in production.

The last couple years, we have put these two cows into ET and gathered up a large inventory of eggs. We tried to mate these cows with what I would have liked to mate their mother to, bulls that have **Maternal Performance** with **Maternal Integrity**. We feel that this bunch of ET calves selling this year is as good as it gets genetically and look the part phenotypically. I am excited to get to work with this years sale bulls heifer mates for years to come. Take advantage of an opportunity on genetics that are not readily available everywhere. We were given a gift from OCC to use some of these genetics and we feel grateful to have them to offer you.

Heifer Bull- HERD BULL- This bugger is for real. I have raised a pile of 5522 sons in my life and this bull is at the top of the heap. He is a full brother to my 767 bull that we have used for years here. This bulls full sister have done an amazing job for us and 767 daughters are about as easy keeping of any emulation bred bull we have ever used. I even bred him to his full sister to see what might happen. What happened is a sight to see. Perfect uddered and fleshing ability to spare. I'm certain he is among the top gainers of the entire calf crop as well. I just don't know if I could make a 5522 son any better phenotypically or write a better pedigree. 5522 x Anchor x Juanada 1450. 50% semen/possession on this bull. **Refer to page 10.**

FEET-STRUCTURE-DISPOSITION

I am not going to spend a lot of time talking about this. It is astonishing to me how this is all becoming the buzz words in almost every publication and catalog you pick up. I could go off on a tangent but I will spare you. Breeding cattle is really quite easy, if you put a line in the sand on what you want and nothing else. It is extremely satisfying. Trimming a bulls foot in order to sell him in your production sale is not on my side of that line in the sand. There is no amount of money that could be made from the sale of that animal that would justify the repercussions of that one animal coming back and or losing that customer. It is just that easy.

Herd Bull- Heifer Bull- Volumes could be written about the success of Joker and his daughters. It's pretty hard to find a line on cattle at OCC that resembles what I like to see in my angus cows and not have Joker show up in the pedigree. I'm very excited to see all these flush brothers head out into the country and make great moderate framed and functional cows. These bulls are backed by Juanada 1650 who will no doubt leave her mark for years to come here. I have retained one of these flush brothers and will it will be exciting to see his influence in our herd over the years. 50% interest and possession in this bull. **Refer to page 10.**

1/2 INTEREST & 1/2 POSSESSION

The buyer will get immediate use of him and all salvage value. When the bull gets to be 4-5 years old and you are done with him, we may take the option of bringing the bull back for our own use. I have done this with several bulls and if you are interested in one of these bulls and have questions please call us and we can discuss it. I can also give you references to the buyers of the bulls that have sold with this option and get there opinion on how well it has worked for them.

Heifer Bull- Volumes could be written about the success of Jocker and his daughters. It's pretty hard to find a line of cattle at OCC that resembles what I like to see in my angus cows and not have Jocker show up in the pedigree. I'm very excited to see all these flush brothers head out into the country and make great moderate framed and functional cows. These bulls are backed by Juanada 1650 who will no doubt leave her mark for years to come here. I have retained one of these flush brothers and it will be exciting to see his influence in our herd over the years. **Refer to page 10.**

Heifer Bull- You will not have any trouble finding this bull. Wide based and loads of capacity in this young bull. His mother was purchased at the Broken Arrow dispersal and she has become a bit of a favorite of mine. This is a great young bull with a lot of potential. 99 BWR/105 WWR on her calves.

I'm a huge fan of this bulls sire. He has left us a line up of exceptional range adaptable cattle that go to work. This bulls mother was purchased in the Broken Arrow dispersal several years ago. Travis Krein and I have traded cattle around for many years and I took his advice and bought this cow. She is everything I wanted and more. A matter of fact I have since flushed cows to the Emblem bull who is the sire to this bulls mother. 101 BWR/98WWR on her calves.

SEMEN AVAILABLE FOR THESE BULLS

DWAIN HOULD, OWNER | 406) 321-4517

THERE ARE MOMENTS IN LIFE WHEN YOUR PERSONAL CONSTITUTION AND FAITH ARE RATTLED. THIS IS THAT MOMENT. JON WAS KIND, SELFLESS, LOVED HIS FAMILY DEARLY AND WAS LOVED BY MANY. I HOPE AND PRAY THAT HEAVEN HAS MOUNTAINS BECAUSE WHEN MY TIME IS UP AND IF I'M ALLOWED INTO HEAVEN, I WILL KNOW WHERE I CAN FIND JON. THE LAST 20 YEARS HAS BEEN FILLED WITH JON MOMENTS. FROM MEXICO TO MONTANA, I WILL REMEMBER THEM FOREVER. I'M NOT SURE AT MY AGE IF PEOPLE HAVE BEST FRIENDS OTHER THAN SPOUSES, BUT I DO KNOW THAT HE WAS A GREAT FRIEND. RIP JON.

Dear Jon,

I cannot say goodbye I haven't got that far, but I want to say thank you for being the blessing that you were.

Thank you for the big smile and good morning greetings each day. I can still see you sitting on the bench at the end of that hallway. Suddenly high school doesn't seem so long ago, who knew we'd still be friends 30 years down the road.

Thank you for the songs quoting my name, you sang them better than any big artist with fame.

Thank you for the shoulder if I needed a hug, and for patting my back to tell me "well done"

Thank you for always seeing the positive when others may have been seeing none. And helping anybody get through situations that might have been tough.

Thank you for the encouragement when I was feeling down, and even the encouragement when I was clowning around.

Thank you for bonding with my husband so well, who knew he'd find a great friend in my old high school pal.

Thank you for stepping out of your comfort zone and crossing the border to a country unknown. Our vacations together were amazing and fun. And we will definitely be toasting to you every time we take a new one.

Thank you for all the laughter whether we were sober or drunk, and always thinking that I'm funny even when your wife and my husband don't.

Thank you for helping us in so many areas of our life. From the ranch, 4-H, with our house, and even with our kids. You certainly are the definition of a very true friend.

Thank you for trusting me to take care of your children, I know how much you cherish them and how they were your world. I know they will grow up to be everything you knew they could.

Thank you for attending all my dinners and parties. I'm going to miss the laughter that you brought, you teasing Becca and us trying to get Carrie to have a shot. Your presence at them will definitely be missed. I don't even know how we will have them without you, dam this is bull shit.

Others may find this strange but I really don't care. You know that about me, so here it is. Most of all, without a doubt, I Thank You for bringing Carrie into my life. For moving her to have and making her your wife. I know how very much you love her, and how precious that love is. You treated her so wonderful, and that's something we will not forget.

We owe you so much and we won't let you down, we will always be here for Carrie and the kids, I promise you we will be around.

Jon, you were the best in so many ways, and in my heart you will always remain.

By Ruby Hould
