HELLO TO ALL OF YOU ANGUS ENTHUSIASTS

WOW! WHAT AN EXCITING TIME TO BE IN THE CATTLE BUSINESS.

Again this year we are pleased to offer you another outstanding set of cows that come straight out of the middle of the herd. Many of the cows are top rationing cows in our herd and have sold bulls in prior sales or will have them in future sales. Many others are younger and out of some of our fresher and newer genetics and cow families with genetics that are anchored down by Genetics With Maternal Integrity. It's very hard to pick and choose to make an offering like this. Again I feel there are options for everyone here. From proven to young youthful cows that have several generations of proven cows and proven genetics behind them.

We hope to make this a very simple and smooth sale. We appreciate all of your interest in the past and wish you all good luck and hope you get exactly what you are after. Please contact me if you have any questions.

Jerome R. Hould

OUR CATTLE

For the last 25 years at Hould Angus we have turned against the mainstream hype of great arithmetic behind each cow. Rather, we have developed a herd of cattle that will survive and excel in our environment by using maternal genetics with maternal integrity.

What is Maternal Integrity? Take a look into Angus Journals and stud books from the last decade and you will see the ridiculous amount of bulls promoted to everyone as the future maternal giant of the breed (because of great arithmetic). Then, look at how many of those greats have completely fallen on their faces, only to leave commercial producers high and dry. We have done our due diligence and driven countless miles to physically evaluate daughters of the sires that we use at Hould Angus. This is one of many things numbers can't evaluate but your eye can. With this philosophy and a lot of patience, we hold out and let the dust settle before we utilize the sires in our program.

We believe that it is time for the maternal Angus cow to make a comeback. With fads and trends of mainstream Angus breeders and AI studs, it has become very evident that the high EPD cattle are not designed for an environment that requires them to be self-sufficient and last well into their teens in production. Is there a place for these cattle? Yes, I definitely believe so. But is it in a ranch scenario that requires cattle to be moderate in size (4.5-5.0 frame), deep bodied, extremely easy keeping and fertile? All of this without a heavy supplement? NO! I don't believe it to be possible to achieve in volume.

We are not anti EPD or DNA but stand on the side of caution with our desire to utilize them as a true breeding tool. With AAA playing with the numbers on a weekly basis, it makes it very hard for us to rely on them as much as many breeders do. To each their own, but we will choose to carry on as we have for now.
