CATTLE WITH MATERNAL PERFORMANCE.
GENETICS WITH MATERNAL INTEGRITY.

FIFTH ANNUAL **BULL SALE**

SATURDAY / APRIL 3, 2021 / 1:00 PM
AT HOULD ANGUS RANCH IN HAVRE, MT

FEATURING A STRONG OFFERING OF OCC AND EMULATION BLOODLINES
SELLING 62 YEARLING BULLS AND
17 REGISTERED BRED COWS
(OR WITH CALVES AT SIDE)

 WWW.HOULDANGUS.COM

HELLO TO ALL OF YOU ANGUS ENTHUSIASTS

It's hard to believe that I'm sitting at my desk and writing this sale info already. Man time is sure going faster and faster. Looking back I realize that I have been raising registered Angus cows now for 29 years. That just doesn't seem feasible. A lot has changed in my breeding philosophy during that time for sure. This year we will be offering 15 more bulls than we normally have in the past. After last year's sale and talking with customers, we decided that it was time to add a few more bulls to the offering. I am a firm believer that we must cull very hard on our bulls in order to give our customers the best product we can. We feel if we dig deeper into our own herd, we are just "diluting the pot," you might say, by bringing in bulls that we normally just wouldn't sell.

So we reached out to Kenny and Rachel Lee of Judith Gap and quickly made an agreement to buy the very top end of their registered Angus bulls. Many may know Kenny and Rachel from their time as ranch and herd managers at the FairView ranch in Melville MT. They have a great eye for cattle and breed cattle much like we would do. When the FairView dispersed, they were given the opportunity to pick out the very top end of the FV heifer calf crop and choose several cows in the dispersal sale as well. It is these genetics that we will now be marketing through our bull sale. The Lee's will be raising and managing these calves till weaning time. At that point, Hould Angus will take possession and grow them right along side our own bulls for the spring bull sale. We are very excited to offer these outstanding genetics and cow families. These bulls will all come with the JBob prefix and the Hould Angus guarantee.

A lot has changed here in the last 12 months as well and most of it for the better. First the bad news, our youngest son Cole has left the house and has headed to Texas to pursue his bull riding dreams. Not going to lie, it's pretty quiet now in this big empty house. Thankfully Ruby has our granddaughter, Hadley, to keep her busy. On a good note, I was able to retire from the HCE/TTC after 20 years and truly believe that if everyone fights for their dreams and has an awesome wife/family in their corner, you can accomplish anything. It is a great feeling to be doing what I enjoy everyday.

As far as the cattle, nothing has really changed and our philosophy is still the same. Breed For The Cow! There is zero emphasis on any EPD and never will be. Just good solid cattle that are fertile, functional, good uddered and productive enough to hang around into their teen years. All this and doing it in an environment/management that is harsh and extremely unforgiving.

As always we will be happy to have you join us on April 3, 2021 at the Ranch.

J Bob and Ruby Hould Family

OUR CATTLE

For the last 21 years at Hould Angus we have turned against the mainstream hype of great arithmetic behind each cow. Rather, we have developed a herd of cattle that will survive and excel in our environment by using maternal genetics with maternal integrity. What is Maternal Integrity? One only has to look into Angus Journals and stud books from the last decade to prove that there has been a ridiculous amount of bulls promoted to everyone as the future maternal giant of the breed (because of great arithmetic). Then, look at how many of those greats have completely fallen on their faces, only to leave commercial producers high and dry. We have done our due diligence and driven countless miles to physically evaluate daughters of the sires that we use at Hould Angus. This is one of many things numbers can't evaluate but your eye can. With this philosophy and a lot of patience, we hold out and let the dust settle before we utilize the sires in our program.

We believe that it is time for the maternal Angus cow to make a comeback. With fads and the trends of mainstream Angus breeders and AI studs, it has become very evident that the high EPD cattle are not designed for an environment that requires them to be self-sufficient and last well into their teens in production. Is there a place for these cattle? Yes I definitely believe so. But is it in a ranch scenario that requires cattle to be moderate in size (4.5-5.0 frame), deep bodied, extremely easy keeping and fertile? All of this without a heavy supplement? NO! I don't believe it to be possible to achieve in volume.

We are not anti EPD or DNA but stand on the side of caution with our desire to utilize them as a true breeding tool. With AAA playing with the numbers on a weekly basis, it makes it very hard for us to rely on them as much as many breeders do. To each their own, but we will choose to carry on as we have for now.

BULL OFFERING

Our bull offering this year is again very heavily influenced by OCC and the old N-Bar Emulation bloodlines. Crossing these two lines has given us females that are very functional in their design with tidy udders and extreme fertility. We consider our cow herd to be moderate in size and very capable of maintaining themselves in great shape even through some very tough conditions. With all that being said, we firmly believe that our bull mates to these cows should offer the same attributes to change your herd towards these functional traits and/or for our long time customers to maintain the type that has brought them back to Hould Angus.

HEIFER AND BRED COW PLACEMENT

Each year we are getting more and more interest in our style and type of cattle. Again this fall we helped place several hundred head of bred cows and heifers to ranches in Montana, North Dakota and Wyoming. If you have females for sale of any class and they are out of and/or bred to Hould Angus bulls, or suitable like genetics, we would like to know about them. The demand is great and the availability to acquire low input moderate framed females is rather low. Please contact us in the future and we will certainly give you a hand in buying or selling your cattle.

JUST MY 2 CENTS

2020 was a year for the record book and I think we can all agree on that. From drought to hoppers, to 3.5" of rain in September, to then several feet of snow in October/November and back to winter drought conditions. I for one would really like a few years of average, man that would be wonderful.

Due to Covid, we had very few visitors to the ranch this year. That was a bummer for sure. But on the contrary, we received countless phone calls to discuss cattle. If you know me, you know I really like talking cattle, so that was uplifting under the circumstances.

A lot of different topics were brought up in these conversations of course. But the major topic on most people's mind was the very poor conception rates they have been getting on their yearling and young age cows. Several had a good grasp on what caused it and where content that changes needed to be made. Others were completely baffled by the outcome over the last few years in terms of fertility. Most would ask my opinion and I had only 3 questions to ask them about their program: 1) When do you breed your cows? 2) what do you feed your young cows before breeding? 3) Where do you buy your bulls for AI and cleanup? Almost all of the answers were the same, no matter the environment and management of the ranch. They were all the same.

First and foremost these ranches were buying semen/bulls from seedstock producers that didn't align with their environment and/or feed requirements. In my opinion, it is best to look for a seedstock producer who feeds like you or less. I think it is now showing up after a couple generations of cattle that are bred for bigger, faster and more. If your seedstock supplier feeds his yearling heifers 20% protein hay and pellets but you feed them 7-10% protein grass hay, that does not work for a heifer that's genetic potential requires much more. Now stack a couple generations of that into your replacements and try to breed them early and you now have a problem. Nothing against producers that feed more than others. If that's what works for them that's great and carry on. If you are having issues with adaptability of your cows, look to a seedstock supplier who mirrors what you have going on with your operation.

“MODERATE”

THE LATEST BUZZ WORD IN THE ANGUS WORLD

My question is, "What is Moderate? Is it the physical frame size of an animal? Is it the mature weight of an animal?" I have my own opinion on this, so for a minute please oblige me. It is my opinion that moderate is just that, Moderate. Middle of the road and average in size. So with that being said, is a 14 month old bull that stands 52"-54" moderate? Is a bull that stands 47"-49" at 12 months tiny? Or this same bull being 48"-50" at 14 months? The answer, I believe, is that most people don't know the difference. And it's huge! I've often been asked why I am always measuring bull hip height using my sale catalog as a guide. And now some of you will find out. Just for visual purposes I looked up the average size of an adult male. It's 5'9" and that is exactly what I am. Ironically! So, if I like a bull and have an interest in purchasing him, I will take my catalog and place it upon his hip horizontally and use that as a reference to where this bull measures up on my body. Mid sternum is 46"-47" and mid chest is 52"-54". By now you have decided I have gone mad but please bare with me, because now you will find out what a huge difference those few inches at 12-14 months of age will make on your mature cow size in terms of "moderate". 47"-49" at 12 months is 4-5 frame. (Moderate). That same bull at 48"-50" at 14 months is 4-5 frame(Moderate). The Bull that is 52"-54" at 14 months is 6-7 frame (Not Moderate). So in a matter of just a couple inches in frame at 14 months of age, could lead someone down the road to a cow herd that just isn't moderate. If you're serious about getting your mature cow size down, take a minute and find out where you measure up. Take your catalog and use it. If the animal is just too quick, use a reference point on a panel, gate or board. If you think you look silly doing it, it's probably because you do look silly doing it. But I guarantee that you will walk away from a lot of bulls that you thought were moderate.

FRONTIER LIVE SALE CATTLE AUCTIONS

This sale will be broadcast live on www.fronterlivesale.com. To view the sale:

1. Create an account, if you have already done so, skip to the step three.
2. To create a new account, click on the word **Registration** in the upper right hand corner. You must fill out the information requested. Then click **Create Account**. An email will be sent to the email you provided. Please click the link in the email to activate your new account. Once you click the link, your account will be activated.
3. Once your account is activated, you may click **Continue To Browse Our Site**. This will allow you to view all upcoming auctions.
4. Once you find the **Hould Angus** auction, click **Get Approved To Bid** for absentee and live bidding.
5. Please enter your information in the form. Depending on the auctioneer, different information may be requested. Click **I agree to sale terms and conditions**. Congratulations! You are now approved for the Hould Angus auction.
6. Login on sale day with the credentials provided at registration.

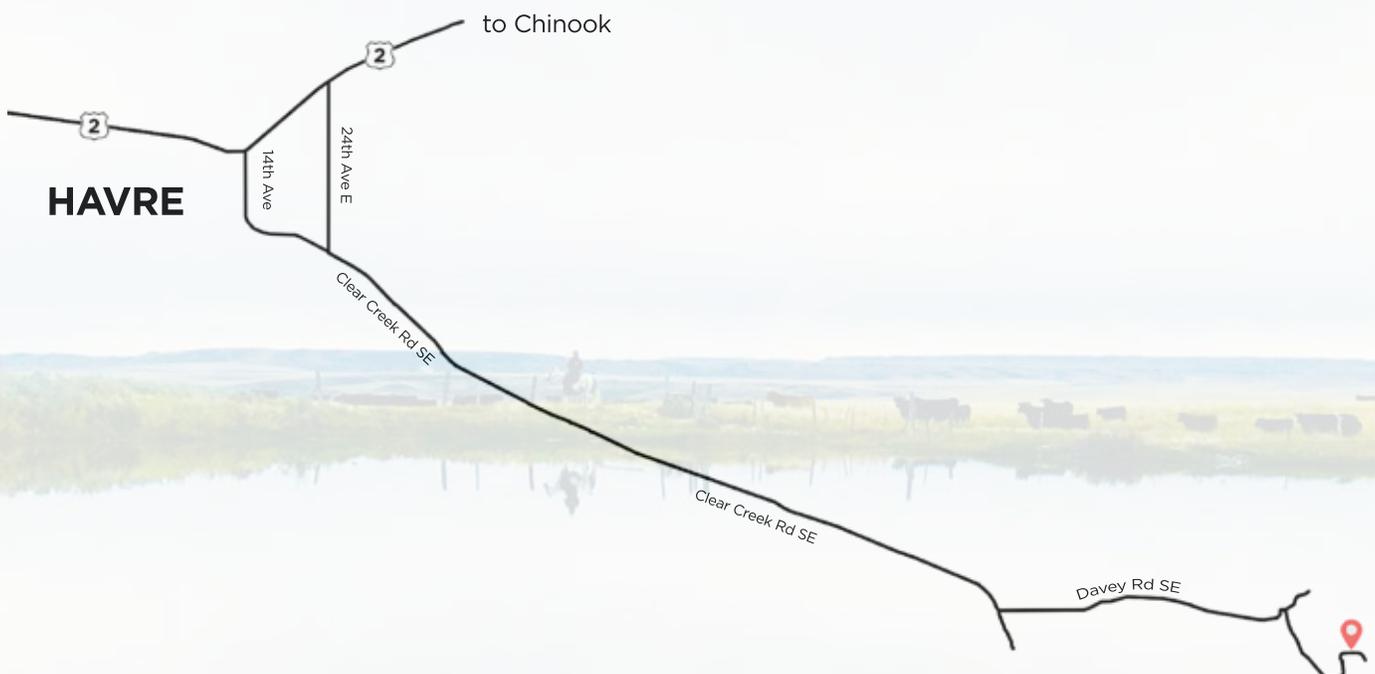

Call 866-313-0123 for tech help.

DIRECTIONS TO THE RANCH

Hould Angus Ranch is located at 58921 Davey Road in Havre, Montana.

- From Havre, travel 1.8 miles on 14th Ave.
- Stay straight on Clear Creek Road (gravel) 5.0 miles.
- Turn left on Davey Road SE, travel 2.1 miles.
- Turn right, 1 mile into ranch.

TERMS & CONDITIONS

All cattle must be paid for in full on sale day or as otherwise arranged prior to the sale.

LIABILITY DISCLAIMER

All persons that attend the sale do so at their own risk and the owners or anyone associated or connected with this sale assume no liabilities for any accidents that may occur.

BULL DELIVERY

Bulls will be delivered free of charge up to 350 miles. Beyond that will be at cost. Delivery of bulls will begin mid-April.

COW DELIVERY

Cows will be at the expense of buyer. Hould Angus will help find transportation. Please call if you have questions.

SEMEN TESTING

All bulls will be semen tested by Chinook Veterinary Clinic before delivery.

HEALTH/VACCINE

7 Way/50M: Twice	Enforce III
Mycoplasma : Twice	Pyramid 5
Fusogard (Footrot): Twice	Ino-pour
Type A Colostridial: Twice	Sabre (Lice)
Safeguard (dewormer) in the ration	Clean-up II (Lice)

RETAINED INTEREST

We retain 1/3 semen interest in all bulls selling unless otherwise stated in catalog or from the block. The 1/3 semen interest is a semen revenue sharing interest only with 100% of the bull's salvage value belonging to the buyer. All collections will be done at the expense of Hould Angus and at the convenience of the buyer. Please contact us if you have questions.

BREEDING GUARANTEE

All bulls are guaranteed breeders and our guarantee is simple, we stand behind the genetics and breeding soundness of our bulls 100% for the first breeding season. If a genetic issue surfaces or if the bull is unable to settle cows, you will get full credit, or a replacement bull if available. If a management issue or act of God occurs, we will stand 50% of the risk. Simply notify us by September 15, 2021 to receive your credit, less any salvage value.

Genetic Rustler is proven himself to be great from calving ease, weaning to yearling. He will have several calves born this year and will see heavy use again this year. An outstanding representation of his sire and carries with him the same sex drive characteristics of his father as well. He is constantly herding his cows and never letting them out of his site. I have never seen him sitting around the water and waiting for something to do. His calves display a great deal of their sire's family traits phenotypically as well, His mother is a superstar in our herd, and we have used 3 bulls out of her. Considering his contemporary group in this years sale. Rustler has shown that he doesn't take second place to anyone in terms of muscle and growth. Semen available.

6143 was a bull that I was the contending bidder on when he sold at auction. I asked the buyer when he was done with him to give me a call. Three years later I got the call and I immediately went and picked him up. The picture we have on this sire was taken the day I picked him up and trailered him to Hawkeye to get collected. An entire book could be written on the cow lines both top and bottom of this bulls pedigree. He was the most sex driven bull I have ever been around. He walked the pasture all day long bugling away. Winter, Spring, Summer or Fall no matter when he wanted cows and his sons exhibit the same characteristics as well. The daughters are fantastic and have done a great job of keeping in the middle of the road. And now that they are 5-6-7 year old cows they are very hard to beat. There was a lot of contention amongst certain breeders that I owned the bull and hence the name. This bull will leave you females that last and last.

Best yet was recommended to us from Tim Ohlde. We where wanting to us OCC Work of Art to bring in some OCC Great Plains, but he is no longer available. Tim had been sending me pictures of Best Yet for the past couple of years so I decided to use him. We where wanting to add a little stretch and size to some of our cows and we are extremely happy with the results. This summer I got to spend the day with Tim and tour his cow herd. Needless to say OCC Best Yet is exactly what we where searching for.

I purchased Cortez in Partnership with Ray Gardner, Kenny Lee and Bryan Pike from OCC where he was the second highest selling bull of the day. Cortez has proven to be a great bull. He carries a massive amount of rib and fleshing ability in his calves that is second to none here. Again his bulls grew like crazy in the feedlot and the daughters show a great deal of broodiness and length of neck and spine. Exactly what we where looking for. Not one single Cortez heifer came up open this fall. And now we are calving them out and they are very well mannered with impeccable udders. Semen available.

We called him Jet Plus and his final calves are selling this year. Jet Plus was a fabulous bull phenotypically and a complete gentleman to be around. Great feet and fleshing ability to spare. His daughters are moderate in size with fleshing ability and tidy little udders. His mother is an outstanding Fahren 21x daughter out of the old Juanada cow. She is still here and will calve 13th calf by sale day to her half brother Classic. Take advantage of these last sons to sell. He truly did save the best for last.

We used Honcho because of his massive body depth and muscle shape. He is very similar in type to our Cortez bull and I really like Honchos pedigree. If you are wanting to moderate your mature cow size than Honcho is a great choice. Honcho has really caught on in the Angus scene now and I believe these might be one of the very first Honcho calves available this spring.

702 is well known to be a female producing extraordinaire. I noticed numerous daughters in my travels and figured I had better give him a try. Only to find out that semen is very limited so I used what I had very sparingly on a select group of cows. 702 will add more length to cattle without adding a lot of frame. He is a calving ease bull that worked very well for us. He is also the sire of our Cornerstone bull that we have in our lineup.

CCA Emblazon 702 daughter and a full sister to our Cornerstone M71 herd bull

Cornerstone came to us as the high selling bull of the Stockmans Source bull sale in Nebraska. Cornerstone is sired by CCA Emblazon 702 who is making his name as a cow making fool. And his mother is McCumber Miss Wix 2022 who has several bulls working in purebred herds all across the country. Probably the most notable son resides at Redland Angus in Wyoming. Cornerstone should be calving ease and was purchased to cover all of our OCC Cortez, OCC Big Time and other OCC influenced females. We bought him as a 18 month old bull and the breeders who raised him used him AI in there fall program. The reports are all very good on his calves. Long bodied and coming very nicely out of heifers. We have sold a fair amount of semen on the bull and semen is available. Proudly co-owned with Ryan Neiman and Travis Christman.

Solitude was our pick of the calf crop that year. He has started off to a sensational start for us. Great calving ase Bull with calves showing plenty of growth and extremely dense muscle. His sire was new to us and is highly regarded as being a outstanding female producer. Solitudes mother (1650) is as perfect of a replication of her mother (1450)as I have on the place. We will be putting in about 60 embryos this spring out of Solitudes mother (1650). 1650 has two sons now working for us. Semen available.

HERD BULL - Heifer Bull - A lot of power in this calving ease Honcho son. This bulls mother is fantastic phenotypically. She is a little bigger outlined because of her sire Windy 1205 and backed by Juanada 9021 who has 2 Herd Bulls in our lineup currently. As Ray Gardner stated when he saw 018 "This will be a feeder calf making fool" and I agree. He will also no doubt make some top end females to put back in your replacements. 107 on her calves.

HERD BULL - I am not sure how to describe this bull that will completely define him properly. 017 might be the greatest performance bull we have ever raised. There was no doubt that within a few days of birth that this calf was going to be special. Double bred to Encore 6143 and out of a superb daughter of the 222 bull back to Juanada. This bull has loads of potential for his new owners program. I will be retaining 50% semen interest in this bull. Please contact me if you have questions.

Big time herd bull candidate here. He is named after a friend of mine that lost his battle with cancer. Ryan Neiman was a great person and his love for Maternal Angus cattle mirrored mine. We purchased and owned a few bulls together over the years because of our strong common enthusiasm for good angus cattle. Ryan let me purchase this bulls mother and her full sister which afforded me the opportunity to get into this powerful cow family. This bulls mother is a front pasture cow and phenotypically flawless. This bull pulls together a lot of Tim Ohlde's type with a touch more length and size. This bull was never going to leave this ranch, but we have decided to share him with someone. We will be selling 50% semen/50% possession on this bull. I have did this with a lot of bulls in the past and if you have any questions please ask. 103 on her calves.

Heifer Bull - You will no doubt find this bull come sale day. I purchased his mother in the Oxbow sale a few years ago. Ken Cook from the Oxbow had purchased a Jetstream son from us and when I delivered that bull, I noticed a small bunch of cows in a nearby pen. Once I got to the pen, I immediately went straight to a cow that looked phenomenal in the pen of cows. It was this bulls mother, and soon after I called to find out what she was. Ken informed me that this was his favorite cow ever on the ranch. Well, that's a pretty good complement in my book. So, when she came available at the sale I knew I had better make a run at her. Ken was at the sale and I asked him again about the cow and he said I think I remember telling you what I thought and smiled. Lots of potential here. Oxbow also still AI's to her full brother. 101 on her calves.

This 702 son has been one of my favorites from the beginning. Possibly because his mother is phenotypically incredible. And not to mention out of Classics full sister. Lots of potential in this young cow and this bull will make some great females.

A thick and densely made Honcho son that Kenny said is the best calf from the day he was born. The Trojan Erica 2373 cow also has a bull calf in the sale as well as her 2 daughters by Renegade. I highly recommend this bull.

This is a super stout Honcho bull out of one of the best cows for Kenny and Rachael. Revolt is an outstanding individual and is possibly a better cow maker than the 7075 bull. 7007 comes from a complete outcross cow family that was brought down from Canada. This is an really good bull with lots of potential.

A very well-bred Cortez son. His brother by 5522 XP was our lot 1 bull in the sale last year. And was purchased by Tait Obritsch from ND. Another son was purchased by Rick Hansen of Froid. This is a great old cow that has done a superior job for us. It's hard to find many purebred cows out there that stick around for 12 years producing bulls like this. And I would guess she still has several more years in her.

Duff New Edition is known to be a cow maker. This bulls mother is out of Southolm Bar Lad 50D who is virtually impossible to find in anywhere. And happens to have 50D scattered all throughout her pedigree. 4244 is also a full brother to Bar Lad 4218 that was purchased by Mark Deboo and sees service at Diamond D Angus.

**LOT 56****FEET-STRUCTURE-DISPOSITION**

I am not going to spend a lot of time talking about this. It is astonishing to me how this is all becoming the buzz words in almost every publication and catalog you pick up. I could go off on a tangent but I will spare you. Breeding cattle is really quite easy, if you put a line in the sand on what you want and nothing else. It is extremely satisfying. Trimming a bulls foot in order to sell him in your production sale is not on my side of that line in the sand. There is no amount of money that could be made from the sale of that animal that would justify the repercussions of that one animal coming back and or losing that customer. It is just that easy.

FEMALE SALE

This year we decided to market some of our bred cows through our spring bull sale. Fall of 2019 we had a very successful online female sale and planned to have that annually. But with our new live sale format on the bulls we decided to streamline things and sell them in the spring. You will have the opportunity to buy some very proven cows that have sold or are selling bulls in our sale. Many have daughters that will take on the task of replacing their mother here.

It is always very hard to pick cattle that go into a sale like this. I want to give you all the opportunity to buy some of our older more proven cows, as well as our up and coming candidates. These cows have taken their licks and have pulled through regardless of their age. You can buy with confidence knowing that these are strong, functional, fertile range cows that have paid their own way here.

Some of these cows will have calves by their side come sale day and others will calve later in the month. We are confident that these cows will move into herds across the country and make satisfied customers of their new owners.

AI Date was June 4 2021 and some cows where in a multi sire group from June 10 to August 1, consisting of:

- JBob Emulation 767
- JBob Solitude 810
- CFC Cornerstone M71
- CFC Fusion 8MT1

All cows have been given Pregguard 10 in the fall and poured February 2021. Also free choice 12-12+ Payback mineral and Redmond salt with garlic.

JUANADA 1450 (8m) the matriarch of our herd. Most all females on the ranch will have her in there pedigree at least once. And many will have her several times in there pedigree. I will continue to line breed this cow into every cow on the ranch through sons and grand sons.

Like I said, It is absolutely torturous to pick out females that will go into a sale like this. Half-brother/half-sister mating. Her sire was a bull that passed way to early. He was a full sister to our Juanada 8108,1650,1750 and 1850. All of them treasured animals for us. Her mom is a cow that I let go in our sale in the fall of 2019 and purchased by Armstrong Angus. We have several daughters of hers to go on with and that made this decision a little bit less painless. Pasture - OCC Freightcar.

This cow will be found come sale day. She is a very moderate daughter of the ABS sire GDAR Traveler 9161 and out of our donor cow 9029. 9029 was a favorite of the visitors because of her very gentle disposition and extremely attractive phenotype. 9161 was a bull that seen very heavy use back in the 90's on big commercial heifer projects. Later on people realized that these daughters would go well into their teens and be very productive cows. His semen was extremely hard to find and after several years of collecting it I had enough to use. This cow will no doubt be the hard-working range cow that will hang around for years. AI - OCC Best Yet - Pasture - OCC Freightcar.

A great CAR Chinook daughter that I purchased from Don Connelly through his spring sale. I believe she was the high selling female that year. Take a close look at this pedigree and you will see many great proven CAR donors in her pedigree. This has been a great cow for us and have 3 daughters that we will go on with. AI - OCC Best Yet - Pasture - Multi.

Quite easy keeping, wide bodied young cow. We have great confidence in these Emulation XP 5522 daughters. Every one of them has proven to be functional, productive and range adaptable. Much like his sire 5522, we will probably never stop using XP. This young XP daughter is out of a super productive Cedar Ridge daughter that we sold in our 2019 female sale to Armstrong Angus. That Cedar Ridge daughter was out of the 1200 cow in this sale. AI - OCC Best Yet - Pasture - Multi.

This is a bigger outlined full-figured daughter of LT Bandwagon 3105. Bandwagon was a Right Time son that was marketed through Genex for several years. Over the course of my travels, I noticed a lot of Bandwagon daughters and so we used him. This cow really took to the Right Time side of the pedigree and she is the biggest cow in our herd. But do not hold that against her because she is also beautifully uddered and can definitely raise a calf. Pasture - OCC Freightcar.

This has been an excellent OCC Jetstream daughter. She is easy keeping extremely Moderate with a perfect udder. Her mother came to us when I bought the entire Whitney Creek Ranch herd. These jetstream daughters are very hard to beat. This OCC Jetstream daughter also has a bull in the sale. AI - Emulation 5522 XP - Pasture - Genetic Rustler.

A very productive daughter of GDAR Game Day. I bought this cow and her full sisters out of the Strommen Ranch Dispersal in 2016. This cow finally gave us a daughter by OCC Best Yet and her sister has given us several replacements including a OCC Best Yet daughter last year. The dam came from the Spickler herd in ND and the cow family is absolute calving ease. 933L has 25 calves reported with a +15 CED and a -5.1 BW. AI - OCC Best Yet - Pasture - Multi.

Focal Point 222 daughters have outdone themselves here. Just look in the catalog and you will notice that every bull that has 222 in his pedigree is very well taken care of. This cow will be no exception and out of that great Pinebank daughter that is now in the Josh Freiburger herd in Nebraska. I think you will be super pleased with this cow. Pasture - OCC Freightcar.

I would like to have had more daughters out of our FairVeiv Rito 2223 bull. They are ultra-feminine and fertile with tidy little udders. The Shea Emo daughter that 7285 came from was incredibly easy keeping and would guess that it came from the Shoshone Encore 1126 in her top line. This Rito daughter has been productive and fertile and pretty easy to look at. Pasture - Multi.

This is a pretty cool cow. Her sire JBob Traveler 543 sired some outstanding moderate sized and extremely easy keeping daughters. I think you will agree when you see them. Her mother has been a rock solid producer as well as her mother by RR Rito 707. I really like this cow and think she has loads of potential for the future. Pasture - Classic.

If your looking for a deep bodied, heavy made, moderate cow with loads of eye appeal. Here she is . A Cortez daughter with a little twist to the pedigree. This cow did an outstanding job with her CCA Emblazon 702 heifer calf last year and I will go on with her for the future. Pasture - Genetic Rustler.
